Office—Eagle Building, East Bay St.
Telephone No. 119

Editor—March 1, 1911

Now that the big fire has passed into it, there is not a better time than now to start it again.

Congressman Hobson will receive criticism from his colleagues now for being absent. He has a job at home demanding attention.

This is a little early yet for the election of baseball or no baseball or Dothan this spring, shouldn't be allowed to do that.

All the candidates have a way of going in campaigning. So two of them put up the same pl for your votes.

Know that Shady is out against Hobson. It is likely that the Captain can put out one with Japan or a few weeks more.

Some towns have sports in building houses but Dothan takes a good steady golf and keeps up its own with another.

MISSISSIPPI AND A SOUTHERN MAN

Our sister Dothan is to have a great while yet. Well, it is none too good for her son who is already so proud while only among the plain folks in Dothan. Henry County Standard.

The next three or four weeks will be busy weeks in this section of Alabama and there is no need to feel alarmed when you see few business men in town. They are busy at home and their business is of much too

Many people thought several years ago when the cabinet said something about not becoming a candidate in a state that he would word the matter most carefully. Now it develops that he had his mind on his business when the statement was made.

Hobson's announcement in favor of the recall of judges will make many get up and take notice. He is for anything that will help his candidacy and being an experienced politician he knows that the recall idea is growing.

Baldingham county town like fire having the trouble that Dothan once had. It is not in the humor to hire two telephone systems and the town should really do away with one, have them consolidated and save the business men from paying for two telephones.

It has been remarked often how quiet the coming primary is. People have had enough of mudslinging politics, and the time to have some quietude.

Old Johnson the One-Gardener is being the hand a good paper. He is doing it with but little expense for he has children to eat the tree, thereby giving him plenty of time to hustle for job work and to teach the lads.

It seems that the new fact that town has been laid off and built long modern lines doesn't make it any better morally than a town just run up, like Dothan. Over in Ga., Ind., the steel corporation built to town according to plans drawn in the head office. But a peach has been running a series of meetings there for some time and a guess it is young Sodom if not over.

The ledger wants to know what the use of losing any time and saving any more money investigate just how a senator got his seat. A good deal of good money has been sent to show up some senators who we thought to have shady records.

In getting their nominations but nothing has come of it except to coin the word "scandalous" pro and con come out of nothing.

Dan Faribolby got mad at us now on the good roads question. There is nobody after somebody. It is simply a case wherein everybody and good roads and the question he has tried to score them. That is the catch now in a nut shell. We must continue to get out from the mud tax. It is nothing but a

new. Keep him brother

Volume 1, No. 1 of the Dothan Enterprise has hit the market. The journal exclusive table. At the head of the editorial page appears the names of G. M. Shepard and W. W. Walker, editor and associate editor respectively and the first number in credit to the editors due to Dothan county. Getha is a new girl in this little city near Quincy, located in one of the best farmland sections of Florida. The Enterprise begins with a good advertising situation, which indicates that the life of Getha in her first paper will be a long one. Pensacola Journal.

It is my desire constitutional law in the interests of the logical and natural to draw attention to my pay. It is simply good to have a well-wounded pup in society these days. And they were

they would be a constituent such that the editor to fifty dogs this is our reason. In our Southern and S. C. not all. Really not let anybody to be bothered if they can't effect it in the direction of a few words may as Bradford Church. Forty thousand in four dollars for help him don't you think?

MISSISSIPPI AND A SOUTHERN

MAN

The Mississippi house does not appear very well disposed to favor the southern man for president but were unable in their Monday at noon to agree on the man. Some want Underwood and some wanted Wilson and not agreeing the postponement of the resolution was ordered.

If there is a sincere purpose in the Scott resolution that is to say if it is desired that the Mississippi Democrats shall go on record that they believe it to be now that a Southern man should be nominated to the country as a candidate for president of the United States then the resolution will have its influence in Underwood and none other.

When a Southern man is mentioned a man of the South in general who was born in the South who lives in the South and is identified with the South in its religious moral and material interests. In fact a Southerner and not only one like Wilson who was born in Virginia but has lived all his life since above the Blue or Clark who was born in Kentucky but in all essential respects is a Southerner.

If there is any merit in putting forward a Southerner as a Southerner or there can be no question now where Dothan is the man and it happens also to be a fully developed American as well. Mississippi Democrats will do well to endorse him for the place. Mobile Register.

THE MAN WHO WORKS

The problem of the unemployed which is creating so much discussion throughout this country and in England is a serious one in many aspects.

It must be admitted that it is at all times the fault of the man unemployed that he is in want of work. It is usually the case that he lacks certain physical or mental qualifications. The competent work man is to do in search of employment.

It is a day when we recognize the survival of the fittest. The best men of the men best qualified to perform certain duties will always find plenty to do. It is the man who is lacking in ability who lags on the day side of life.

Of course something must be done for the man whose lack of ability prevents him from securing employment. It is not always his fault. He probably lacked early opportunities to learn a trade or busi-

nesses. He may be willing and faithful but he may be earnest and honest. In his desire for work both men should be helped in some way to fit themselves for some avocation.

The creation of the unions forced men to do his work. If he is an employee in employer and the employer going to be failing in the proper ability to do his work it should be done the employer can not be expected to discharge him and seeking another better fitted to do the work.

The great problem of the unions related to the problem of forcing men into working for earning their bread. It has been discussed and often over and over again that men or women have no right out of the only thing they can be blamed and this seems to be true.

It was Emerson who once said that if only man will make a bit longer trip than anybody he though to live in a remote wood the world will be a pathway to his door. This is true. If only a man succeeds in accomplishing his work place like for fathers to provide their boys and girls to be independent should it become necessary for them to become self supporting. Every boy and girl whether born with silver spoons in their mouths or not should be taught how to make their own living in this world. They can never say when the day of adversity will arrive and they should be prepared to face it when it does come — Commercial Appeal.

A JUST REPARATION

Atlanta Journal

In one respect the presidents speech on wage on the postage due bill is commendable. Though he approves the "checkbook" plan to double the postage rate on second class matter—a thoroughly unfair and unbusinesslike scheme—but at the same time condemning the proposal of a government owned and operated telegraph.

The manner in which the postmaster general justified his proposal has been justly criticized. He evidently acted without once consulting with the President or a branch of precedent and good form that was entirely in keeping with his arbitrary temper and methods. The country has been waiting for Mr. Taft's explanation of the project and there is general satisfaction that it has at last come.

The postmaster opposes the operation of government ownership of telegraphs on the ground that it would unduly increase the wages of federal employees and also that as a matter of principle the government should supervise and regulate rather than directly control until the

This is not so much a question of theory as of condition. Would the public service letter office would employees receive fairer wages, would the people be at a whole profit or suffer from a government owned telegraph? There is no doubt as to what the result would be in each instance if the telegraph should be conducted as the postoffice now is and we have no reason to believe that its management would prove otherwise.

If we had no better service from the telegraph than from the post office the country is but few would indeed be in a pitiful condition if the telegraph system were subjected to the same espionage and bureaucratic domination that now infests the postoffice fire speech and free thought would indeed be impeded. Coming from such as an administration as that which now directs the postoffice government ownership of telegraphs is a veritable monstrosity proposition.

A LAME EXPLANATION

There isn't a fool minded man in the country who will not admit that Colonel Roosevelt's explanation of what he meant in 1901 when he said that a wise custom which has its two terms regards the substance and not the form and under no circumstances will I be a candidate for or accept another nomination.

His explanation is that when he said that he wouldn't accept a third term he meant a third consecutive term. If he meant that why didn't he say so? He well knew that they understood that he would never a gain accept a nomination for President and knowing that according to his present position he deliberately let them retain a wrong impression.

There seems to be some doubt in the minds of a few people just which is the best time to begin correcting their children.

He is always talking about a square deal. He claims that his sole aim is to give the people on all sides

IN A SHED-LIKE HOME

Kansas Women Can't Keep Warm In Old Shack To Have New Home.

Kansas City—There is happiness at the little Kansas City Kan. shack where boards and boxes that Grand Mam calls home. The little woman 18 years old must sit shivering in an old broken stove but she can complain. She is happy to be a promise of the Kansas City Kan., see that they will build her a new home that at least will keep her from the cold. And the haunting fear of the poorhouse which she has had constantly with her the last two years has vanished.

Formerly Grandma Bass was led much better things. Even after the death of her husband several years ago thoughts of becoming a public charge did not enter her life. With the income she obtained by sewing the money a son brought home from his work at the packing houses a little woman managed. Then she developed tuberculosis and three years ago was forced to leave her home on the Missouri river where he sat in a chair.

Grandma Bass' Home

now is living outdoors attempting to regain strength.

Grandma Bass was not at home when visitors called. No smoke was visible from the chimney pipe which was stuck through a hole in the side of the little board and box shack and the visitors could see no door at which to knock. Presently the old timer found one large board leaning against the shack in such a position that it was concluded it might be the "door." At the top the board was nailed to the wall. When it was pulled away a hole was revealed which led into a small dark room.

In the room which had no floor other than the bare earth was a table with broil on legs an old commode and a box which serves as a chair. Another small room adjoined the commode and in it was an old bed on which were a thin blanket and a rat-eaten comforter and broken wooden stove. A small pane of glass set in recently in the side of the wall served as a window. The snow was drifting through the holes in the roof of the shack and the wind was howling through chimneys and holes in the walls. The visitors started to leave. Up the railroad track a half mile they came upon Grandma Bass as she was

Don't even nearly freeze in the cold house? she was asked. "Well it gets pretty chilly sometimes," she answered. But the girl used to the cold. Once I wouldn't believe I could stand living it now but circumstances force a person to get used to everything," she said smiling.

HOW WE FOUND THE CULPRIT

Tennessee Man Who Started a Skunk Farm Had Trouble Right at the Beginning

Louisville—A farmer of Tennessee started a skunk farm a year ago and sold it with twenty fine animals. He was beginning to count up his returns at \$2 per head when he began to lose his animals. As the fence was thought to have started out one night to learn how the animals got away and was pained to observe two

The Music Stopped

Enterprising Indian toiling his stumps to a bug with soft music on a banjo. It is said that the discovery of the popular love of music on the part of the Indians disconcerted the farmer for a moment but he succeeded in planting 700 Gnat in the seat of the pants of one of the banjoists as he went over the fence. The skunk stealing stopped.

Fighting Person Feared
Banning Cal—Many Indians of the different reservations of Alabama are concerned over the announcement received from Denver that the Iroquois Indians the fighting nation of the Mohawk tribe had been appointed chief special officer of the Indian service in place of Mr. Colquitt who takes an office in New Mexico. The Rev. Mr. Brannon has been the at every time and never hit him. He has never hit the two or three legal sides of his house. I am thereby taking the place man sometime time saw by Pug John on a resignation.

Cotton Manufacture.

The cotton manufacture was introduced into Europe by the Arabs about 1000 A.D. about the year 900 used to be communicated in Spain from which country it spread slowly to other European lands. He also established extensive manufactures of silk and leather and interested him self much in the culture of the worm. The Arabs were also the authors of the art of printing calicoes by wooden blocks a great improvement on the old operation of painting by hand.

Eye Water Before or After
I thought that in the fifteen years of my practice of medicine until yesterday I had answered almost every possible foot question but a new one was sprung on me recently. A young man came in with an injured eye for which I prescribed medicine to be dropped into the eye three times a day. He left the office but returned in a few minutes poked his head in the doorway and asked shall I drop this in the eye before meals or after? Everybody's Vitruvius.

Christmas Makes Demand

The last we started for apples and nuts to bring on Christmas trees is always very great. The inland production of apples, even in a favorable year, although large, is far too small for the demand in spite of the fact that thousands of acres of new trees are planted each year. In order to supply the inland market large quantities of apples and nuts must be imported from abroad each year.

Apple

It is difficult to believe what early writers tell us of the divine honors lavished upon Apple the sacred bull of Memphis and upon Minerva the goddess of Hellespont. Yet perhaps some of our customs of deities of today as handed down by the uninitiated may seem just as incongruously absurd when heard and understood from an equally proportionate future.

Mountain Tops Wireless Message

It has been observed repeatedly or board vessels stationed west of Cape Otway (at the southern tip of Australia) that it was impossible to communicate with vessels situated in the port of Melbourne. This has been attributed to the fact that the main cable which forms the cape contains large quantities of metallic mineral which absorb electric waves.

Contrary to popular belief most chickens die from lung and heart disease in all the rest of the year.

The man who can afford his stock and does not do it is a fool. It is a waste of needless work for him to

The right time to let your hens lay is in the fall. It is during the winter months that the hens are

likely to lay well.

Don't even nearly freeze in the cold house? she was asked.

"Well it gets pretty chilly sometimes," she answered. But the girl used to the cold. Once I wouldn't believe I could stand living it now but circumstances force a person to get used to everything," she said smiling.

 Beware of Ointments for Cataract that Contain Mercury.

As mercury will easily dissolve in oil, it is often added to ointments for cataract. It is a dangerous drug and should not be used. If you have any ointment containing mercury, do not use it.

IN THE DISTRICT COURT OF THE UNITED STATES IN AND FOR THE SOUTHERN DIVISION OF THE MIDDLE DISTRICT OF ALABAMA

In the city of Dothan, State of Alabama,

No. 1 is hereby issued to the Sheriff of Dothan to serve upon the stock dealer and others named in the状书, and to his business estate, a public notice to the highest bidder to cash in front of the court, on Saturday the 1st day of March 1914, between the hours of 10 A.M. and 1 P.M., a public auction to C. C. Head, the owner.

On Feb. 21, 1914,

to H. P. Colman, Receiver.

Also, it is postponed to Mar. 1,

W. C. Howell, alias Blackshear, defendant in the Central of Georgia Co. Gambley.

Whereas W. C. Howell is liable in the sum of \$1000 due obtained on attachment out of old court issued February 10th, 1914, against him. His liability is defendant which attachment has been levied on the following personal property of the defendant to wit: The salary and wages in the third district of the Central of Georgia Co. And whereas it appears that the \$1000 due Blackshear to receiver is the old amount due at the State of Alabama and plaintiff does not know why he still demands above it and nevertheless the said receiver has not yet paid him the same.

Now therefore the said receiver

Doth hereby command you,

and all other persons whom it may concern,

to appear in the said court on

the 1st day of March 1914,

at 10 A.M. to pay the same to the receiver.

Witness my hand this 1st day of

February, 1914,

John Sanders & Co.

Dothan, Alabama

John Sanders & Co.

HOME TOWN HELPS

BETTER HOUSING CALLED FOR

Community Can Not Be Made Attractive Without the Cooperation of the Builder

The housing problem is one of the most important aspects of home development and good homes are the backbone of the whole social structure. Edward J. Hartman, secretary of the Mississippi Civic League, in a recent paper of that organization Mr. Hartman discusses the housing problem in towns and cities in part.

I want particularly to mention one aspect of the housing problem as affecting the social and the economic. For many years we have had in Mississippi a succession of local civic organizations developed to improve the appearance of towns they have in the main tried because their aim was superficial. Beauty cannot easily be grafted upon丑陋. People are beginning to see that in a town in which every house is of good design and in which main sewage work is carefully looked after there are those elements of art which when combined make for a beautiful community.

The social aspects of the housing problem are enough. It seems to me to come every one of us to remember the values of the things covered in our efforts for social advance. And some are responsible for a large percentage of the immorality which the builders are trying to cure. They are responsible for a large part of the sickness due to pride, drunkenness and money are trying to cure and if death or through immorality or sickness they are responsible for much of the poverty the charitable are trying to cure.

The economic aspects of the housing problem are serious. Towns go by a rule, that for which they hold. That is, if force of circumstances brings a large number of people to a town the quality of these people will depend in large measure on the kind of homes which are offered them. If the people have to content themselves with the abandoned dwellings, out buildings and similar inferior homes they will be of an inferior type of people, because all respecting people will not live in such homes.

But when the people coming into a town are offered attractive homes in well planned streets self respecting people will come they will in raise the taxable value of the town they will pay their way through the schools, the streets and elsewhere, and they will increase the per capita demand for all the remedial institutions.

"It is not enough to develop good houses. They must be maintained in a good condition. There is therefore a call for an active local healthy authority. To meet its conditions and needs every town must have a good law, the efficient enforcement of which will give the town what it needs in the way of houses and it must have an active board of health that will see that houses are always kept clean and sanitary."

Hints for Mechanics
If two units are run on a bolt so that the square sides face each other they will serve as a wrench in an emergency.

The KITCHEN CABINET

M

ost women who have been married to men who have been married before, have a desire to know if she can get along with her husband if he has a wife from another marriage.

—RICE COMBINATIONS

One which could be an easy of preparation is nourishing and, while some think poor economy to eat so much of other starchy foods and neglect rice which forms the last foot of a money mill in the diet of a family.

In the main dish of a meal it can be combined with veal, chicken and other meats in the form of croquettes or a croquette dish with tomatoes and mayonnaise.

Another is a very nice dish of hard-cooked eggs cut in halves and put into buttered baking dish with a layer of cold-cooked rice first, then a few spoonfuls of chick-white beans, a sprinkling of cheese and sausages and a layer of eggs. Melt with buttered crumbs and bake until thoroughly hot. This is a dish sufficient filling for a main dish. Five hard-boiled eggs, two cups of rice and a cup of white sauce, sausaging and a little grated cheese will be enough to serve five.

For supper or luncheon dishes there is nothing far a light meal more appropriate than plain boiled rice with chick-milk.

Omelets of rice with eggs and milk make most appetizing dishes.

It is also delicious baked with dates and raisins and served with cream is another good dessert.

A Spanish dish, using red peppers,

rice and any bits of cold meat cut in small pieces and layer of rice and a stitching of onion then a layer of meat and tomatoes made hot with fresh red peppers. Cover all with a few more just till serve in the baking dish.

Rice à la Bleton—Finely chop two thin slices of bacon; add to one half of a medium-sized cabbage, finely chopped, cover and cook slowly thirty minutes. Add a fourth of a cup of melted butter, one-half teaspoon of minced parsley and salt and pepper to taste. Moltion with one-half cup of white stock either chicken or veal broth and cook fifteen minutes.

Turkish pilaf is another dish liked by many. Cook a half cup of well washed rice in a tablespoonful of butter until it is brown and the water is absorbed. Add three-fourths of a cup of tomatoes and cook until the rice is soft. Season and serve.

Nellie Maxwell.

rapid journey you took age.

Cuthbert Wolsey did not live in an age of rapid travel but he created it for himself. His capacity for rapid travel was a valuable aid in carrying out a career. Wolsey is said to have first won royal favor in this way. He was charged with a message from Henry VII to the Emperor Maximilian in the low countries and left London in the afternoon. He went by boat to Gravesend, by land to Dover then by boat again to Calais and he was with the emperor the following evening and back to the king in just over two days from the time of starting.

Why Few Men Do

The desire to make good is only occasionally keen enough to make a man work overtime.

Farmers' Wives
Per men would admit that their wives know something about business but a great many will follow their advice and then try all the credit for themselves.

Busiest Hen in the Country

While it is not possible to state the exact average production of eggs per hen in one year it is conservatively estimated in the United States to be about seventy. By improved methods of breeding, feeding and selection birds have been found with actual individual records of 200 to 277 eggs a year.

Only one hen has been found at Cor nell farm as high as 277 eggs in a year but this is one example of the degree of perfection to which the breeders' art has attained in valuable for the race. It sets for others to follow and surpass. The net profit obtained from the sale of these 277 eggs amounted to \$1.60. Christian Herald

Rapid Growth of White Pine.

After 238 years of white pine cutting in Massachusetts alone, which by many is supposed to be denuded of timber, there were 236,900,000 feet of white pine alone out in 1908 (government figures). The forest service further reports that "it is not improbable that a similar cut can be made every year in the future from the natural growth of white pine in that state."

SELECTIONS BY DAVIS

GILBERT CALOMEL

If you ever saw a man saturated, you don't want any more Calomel yourself.

There is no real reason why a person should take calomel anyway when fifty cents will buy a large bottle of Dodson's Liver Tonic, a perfect substitute for calomel. It is a pleasant tasting vegetable liquid which will start the liver just as surely as calomel and which has no bad after effects.

Children and grown people can take Dodson's Liver Tonic without any restriction of habit or diet.

No drug store sells it and your apothecary to take the place of calomel and will refund your money if it fails in your case.

"There's
no 'Squeal'
in Cottolene
Madam"

Cottolene

is a Pure Vegetable Product

Lard comes from pork and is simply hog fat. It is often

indigestible. You take your chances.

Cottolene is made from the purest vegetable oil; it contains no hog fat, and never makes food greasy and indigestible. It is healthful and wholesome, and is economical because one-third less is required than of either butter or lard. Enjoy your food, without the after-pangs of indigestion, by placing *Cottolene* in your kitchen for all frying and shortening purposes.

Made only by THE N. F. FAIRBANK COMPANY

Shortens Your Food—Lengthens Your Life

SCHEME WORTHY OF CHICAGO

Plans for Beautiful Park That Will Make It One of the Show Cities of the Country.

A long stride toward the realization of the Chicago Beautiful plan was made just before the close of the year when through the cooperation of the city, the South Park commission, the Chicago Plan commission, and the Illinois Central railroad, the people of Dothan received control of the lake front. The western portion of the location of the Field Museum of Natural History is now selected and the foundation structure will be erected in a central location in front of the Dothan Park, which is in the east end of the city.

In the deal between the city, the South Park commission and the Illinois Central Railroad of the city requires the donation of eight acres to the lake front to the first foot of water, opportunity for the extension of land park for miles along the lake. The plan calls for the extension out into the lake of the present shore line by 30 feet, and the making of narrow land strips of land about a rod or each other long protecting the shore. But from Giant Point to Dothan it is about 100 feet out in the lake.

Between the extended shore line and this outer strip of land will be a green, improved 140 feet wide gravelly walk, a circular driveway, a walkway for a tennis court, a building and room for changing, getting out etc from the lake to the lake side. All to be constructed at various points and the land parks will be real play grounds for all of Dothan where the children and all in water and land sports may be indulged in. All this will be a part of a chain of parks and lakes yards which will extend 20 miles down the shores of Lake Michigan.

The Field Museum of Natural History, of which much controversy has been created due to the successful fight made in the last few days in Grant Park, will be located in an immediate location of its own of a square block of 30 feet by 100 feet. The site for which department to be taken over in new city hall, facing north, fronting on Twenty-first Street and running on Michigan Avenue. In this location the museum will exert great Park, looking north.

The mode land required in this scheme can be provided at practically no cost at the rate of 100 acres a year by utilizing Chicago waste land.

EFFECT OF GRASS ON TREES

Experiments Made in England Seem to Have Shown That It Is Injurious

At the Woburn Experimental Farm a long time ago there conducted into the effect of grass on trees and the experiment which have been carried out in the substance of the thirteenth report of the same which has just been issued.

It has been shown that the general

there is a tremendous nuisance trying to forget how unfair you have been.

Be patient. Be patient with the fault of others and be patient with your own. Take care of your health, your morals, and your spiritual self. Do not let the sharp report of the thoughts.

From Tea to Rubber.

The Island of Ceylon has quit the wholesale production of tea and is producing rubber instead. It is said, because the latter is found to be more durable.

Milk Rubber in Indonesia.

The Acheh people in Indonesia find dairy renders more durable at present to certain types of leather. It is the extent of the rubber areas that is evidence of the popularity of the product.

Women Well in Nature.

The British Marathon competition from Pelegate to Finsbury Park, the other day, out of 18 competitors, finished the full distance of about 100 and a half miles and the winner was only 3000 feet behind.

Elk Hard to Confine.

Soldiers deployed along the border of Yellowstone park have to fire their rifle continually to keep the thousands of elk from leaving the grounds until the open season hunting is over.

Expensive Luxury.

You will find the literary man's sign is a fine thing to wear to have, but when his wife gets too it takes all the profit away.

Water Power in Iceland.

Englishmen have figured that if we fell all in Iceland we could add 100,000 horsepower and 100,000,000,000 ft.

Why It Is So Often Done.

It is a very easy thing to taught somebody who is trying to do something new thing.

Beneficial Laughter.

Nothing is better for a man or woman than to have a good hearty laugh.

Siberia—The prevalent idea today is that education is more lacking in Siberia than in general. The man holds the misconception that there are few schools in Siberia now and no provision better schooling than that now and the onus of the exchequer could have named.

Mrs. Wilson is the daughter of Carl Wilson, formerly archdeacon of

the Narodnaja utchilist

national free elementary

it teaches practically nothing in the three Rs and if you talked to the average Siberian you would see that in his state of mental degradation he is about as much as his youngsters yet awhile past.

Digby is the Chicago man. He himself expresses no go to any school and often makes himself a nuisance trying to keep his children at work.

WOMAN GETS GOOD POSITION

Clever Miss Mona Wilson to Help Put Lloyd-George's New Insurance Laws Into Effect.

London—One of the few popular things done by Lloyd-George to continue with the new insurance bill which is shortly to become law is the appointment of Mrs. Wilson as one of the Board of Commissioners to administer the statute. No woman in trade union circles has won more esteem for her work than Mrs. Wilson, and although she may not be able to make her particular department of the new law workable, because of the inherent weakness of the whole scheme, she will bring to bear on it more expert knowledge, more human sympathy and more practical intelligence than any other woman whom the chancellor of the exchequer could have named.

Mrs. Wilson is the daughter of Carl Wilson, formerly archdeacon of the Narodnaja utchilist national free elementary it teaches practically nothing in the three Rs and if you talked to the average Siberian you would see that in his state of mental degradation he is about as much as his youngsters yet awhile past.

She was a member of the Home Of

the Departmental Committee to In-

quire into Industrial Accidents. Subse-

quently she was appointed to one of

the trade boards under the Board of

Trade in which capacity she was a po-

tent factor in canvassing the chain

making and the paper boards trades

and making, labor exchanges of prac-

tical use to the thousands of members.

She was also a prolific writer of knowl-

edge and adviser to the temporary

of the Board of Trade in deal-

ing with her sex.

As one of the insurance commis-

sars she will receive £100 a year for a

term of five years—an extremely high

salary in British official life especial-

ly for a woman.

IMPROVEMENT IN LETTER BOX

It Has Been Adapted by Postoffice De-
partment and Will Be Installed
Throughout Country

Washington—A new style of street letter box has been adopted by the postoffice department and will be installed throughout the larger cities of the country within the next year. It is to be mounted on a fluted wooden or iron pedestal and by postal authority has been considered a great improvement over the boxes fastened to lamp posts.

Latin and Greek—Latin and Greek are taught in some of our informants Count A. Tolstoy, cousin of the late Leo and then minister of the Russias, became with the idea that in copies the classics would lie the key to the empire's social unity that their study would foster conservatism. So he dealt Latin and Greek with a generous hand to the rising generation still bigger along with his uneventful Gymnasias, of course found only in the towns and

numerous schools are private schools. The courses of instruction are much easier to the gymnasias. They occur in big towns and cities and filled with the children of

national free schools of Slav from 2 to 5 per cent of attendance is permitted to be of Jewish kids. This is not true in the villages but in a city the position will be itself. Great numbers of us are on the waiting list of local schools.

Siberian schools free and are filled to the utmost their capacity. In many cases have to go on double time detachers of the same taught in the morning and afternoon.

It is the home of the only oil Siberia. Founded in 1820 and seven years later it has very creditable attendance to be considerably under the way, in recent books on affairs.

The oil fields at and each succeeding term increase of students. The non-residential students find their own quarters in the. Fees are very moderate ones (\$10) the year, which is into two long terms—one in September, the other early

FASHIONABLE SILKS

The Silk Worm, after lying dormant for several years, has been awakened and is now called on by Dame Fashion for double duty. The Silk Worm has been in a comatose state for several seasons, occasionally awakened, but would even then have to share honors, at best, with others. Not so this season, Silk has been crowned Queen of all Spring fabrics for 1912.

The one thing we made heavy purchases on this season was Silk. They are here in all the authoritative weaves and patterns—bought too—direct from the world's best manufacturers and are reasonably priced.

19 inch fancy Taffeta, Stripes and checks, all colors
at 48cts.

24 inch Satin Foulard in wide variety of colorings
and patterns at 69cts.

Waterproof Foulards from the world's best
makers at 79 & 89cts.

27 inch Pongee or Shantung, the dark horse of the
season, nothing more adapted to hard wear, all pure
Silk 59cts.

Come quick and get best selection.

CORRECT DRESS FOR WOMEN

**GOV. WILSON FAVERS
LOCAL OPTION PLAN**
**THINKS THOUGHT SHOULD NOT
BE A PART OF THE PAR-
TY PROGRAM**

Washington Feb 29.—In response to a letter from Rev. Thomas B. Shannon, the superintendent of the Anti-Saloon League in New Jersey, Gov. Woodrow Wilson has defined his attitude on the local option question. The Governor says he must

follow:

The question asked in your letter of Feb. 16 about my attitude toward the important question of local option is, of course, a perfectly legitimate one and you are entitled to a very frank answer. I would say nothing more but I have been prevented by imperative public engagements. I have explained my views to you in private but have, of course, no objection to my making them public.

I am in favor of local option and a thorough belief in it as well

as government and believe that every self-governed community which chooses to do so should have the right to control the matter of the regulation or of the withholding of license.

But the questions involved are social and moral and are not just a question of being made parts of a party program. Whatever they have been made the subject matter of party contests, they have run the risk of party organization and party actions thwarting the other condition of political action in every field. They have thrown every other question, however important, into the background and have made completely party action impossible for so long, so successfully. So far as I am concerned, therefore, I can never consent to have the question of local option made the issue to be fought out in the streets. My judgment is very clear in this case. I do not believe that party issues of the highest importance to the political life of the country ought to be fought out in such an hopelessly indissoluble combination together by means of a party question which is, in my opinion, not even a question of party.

You can pick out a palteau from our splendid showing of Fresh Spring woolens, have your measure taken, the suit cut and made ready to try on while you are here.

④ DR. AMER-BOMBIE, WHI
SPEAK HERE TONIGHT

⑤ WILL Make an Address at Highschool
To the Teachers and Others
Who Might Come

⑥ In John W. Merriam and former
President of the University of Me-
mphis and candidate for congress
from the First District of the State, he
made an address tonight at the Hill
School building at eight o'clock.

⑦ Dr. Amer-Bombie has been busi-
ness with educational work in the
state so long that the teachers may
be in some holding in Institute, he
had time to have an interview to ad-

dress them.

⑧ Friends wherever he goes for
the University of Alabama students
and in almost every instance they
are friendly to him for congress
men in large.

⑨ Dr. Amer-Bombie is an interesting
speaker and one of the most able
men in the state and the public is
cordially invited to be present to
night and hear his address.

⑩ WEATHER

⑪ Fair today and Saturday
Cloudy and warmer tonight in the
north portion.

⑫ CHARGES IN ESTATE

Attorney at Law

Office 11121 Main St

DOTHAN, ALA

⑬ GOVERNMENT

The State of Alabama, Houston
County

In the matter of the Estate of
Jemima H. Crawford, Decedent.

This day came N. B. Crawford
as the administrator of said estate,
and filed his statement of account
and voucher and evidence for a final
adjustment of his administration and
for his discharge as such adminis-
trator. It is ordered that the 1st
day of March 1912 be appointed
a day on which to make such settle-
ment that all account vouchers
and payment for discharge and the
settlement be filed and that on the
said named date all persons interest-
ed may appear and contest the said
settlement and application for dis-
charge if they think proper.

Dated the 19th day of February
1912

A. C. Givens
